

# DERMASCOPE

The Encyclopedia of Aesthetics & Spa Therapy

June 2019

**Skin Conditions**  
**Mature Skin**

The Official Publication of Aesthetics International Association

“Helping other aestheticians learn and grow their businesses is my passion. We get to make this world a more peaceful and happier place one client at a time. However, in the process of making everybody else happy, we need to be able to charge an affordable but fair service fee and still be able to put money away for health insurance, education, vacation, and retirement. That is where Skin Blends LLC, Agape Pure Wax, Aesthetically Correct Cosmetics, and the Advanced Skin Care Training Academy excels.” *Kathleen Carney*

# BEHIND THE BRAND Skin Blends LLC

**F**ounded in 1999, Skin Blends LLC continues its mission of providing licensed skin care professionals with the most comprehensive and efficient custom blending skin care system on the market. In addition to Skin Blends, the company began manufacturing a 100% mineral makeup line in 2001. It is called Aesthetically Correct Cosmetics. Then, in 2015, they began manufacturing Agape Pure Wax, known for being less painful than traditional waxes.

Everything manufactured is used at Skin Blends Clinical SPAtique and the Advanced Skincare Training Academy (ASCTA) located in Nixa, Missouri. They offer advanced training for licensed professionals in IPL, photo facials, dermaplaning, LED light therapy, microchanneling, skin analysis, and clinical treatment protocols.

Skin is in a constant state of metamorphosis. It can change from season to season, month to month, and even on the same day; skin can be different in specific areas. Skin Blends Professional Custom Blending System allows skin care professionals to customize and alter client formulas as needed. The 32 ounce backbar products are used for treatments and for formulating retail products. Bases contain no artificial colors, fragrances, mineral oil, formaldehyde donors, parabens, phthalates, or sulfates. When professionals blend a retail product, clients cannot purchase it from anyone else. After analyzing the skin to determine the appropriate base product, professionals can incorporate targeted, skin improving synergy blends (botanicals, lipids, cosmeceuticals, and so forth). Clients may then choose the aesthetic components (aroma, color, and container) to be involved in the experience.

Skin care is a passion! Smart aestheticians love Skin Blends because of its great retail and treatment products – which equal happy clients, great profit, and customer loyalty. Skin Blends offers monthly promotions, marketing materials, and ongoing support and training. Skin Blends is proud to be a professional partner in supplying all product, equipment, and training needs.
