GAME CHANGERS

Winning Waxing Ingredients: 3 Staples for a Superior Wax

Australian Sandalwood: Made from trees native to southwest Australia, Australian sandalwood is prized for its natural fragrance and many benefits for the skin. Among its skin care benefits are its astringent, emollient, antibacterial, anti-inflammatory, and antiseptic properties.

Mica: Mica is a common mineral ingredient used in skin care and body products. It helps to produce a shimmer in products and is loved because it is produced naturally and is safe for most skin types.

Microcrystalline: Derived from refining and de-oiling petroleum wax, microcrystalline wax is known for its fine crystals and flexibility. It is viscous and emollient in nature. It is generally harder and has a higher melting point than other types of wax.

LYCON Wax

MANifico Hybrid Hot Wax by LYCON Wax is a precise blend of LYCON traditional natural pine resin formula and LYCOTec synthetic film wax formula. It is made with titanium dioxide, micro mica, and Australia sandalwood to calm and protect the skin. 855-890-2984 or lyconusa.com

Skin Blends LLC

Agape Bliss Ultimate Strip Wax by Skin Blends LLC can be applied in an almost transparent layer and removes hair efficiently and completely. It is more cost effective than hard wax for larger areas. Main ingredients include glyceryl rosinat, PEG-3 dirosinate, and mica. 877-754-6253 or skinblends.com

Cirepil by Perron Rigot Paris

Cristalline Hypoallergenic Non Strip – Hard Wax

Cirepil by Perron Rigot Paris is cruelty-free and vegan. It is a rosin- and fragrance-free, microcrystalline formula with super thin, super economical application for use on eyebrows to Brazilian. 800-947-2314 or cirepil.com
